LOW COST HIGH RETURN TOOLS FOR PROFITABLE CATTLE

“Cydectin LA is an important part of our parasite management control program. Using Cydectin LA at weaning provides us with the critical control of ostertagia for an extended period. We also find this drench vitally important as a pre-calving parasite control for our heifers - the most valuable stock on our property.”

We have been using Cydectin products for the past ten years and found a significant increase in dung beetle activity and an increase in the number of dung beetle species on our property.”

Stephen Peake

The Peake family at “Bowen”, Barraba operate a Poll Hereford and Angus stud enterprise, selling in excess of 100 bulls annually.

This will be one of the last opportunities to secure a Uralba U160 son. We originally used him as a yearling and then sold him at Dubbo National in 2001 to Mt Raven and Grathlyn studs. We were fortunate to be able to purchase Uralba back and used him here at Bowen where he remained in use up until this year when we have sold him again. He was still sound in all areas at ten-years of age. His daughters have excellent udders and his progeny are clean skinned, soft easy doing cattle that breed-on these important traits.
